AUTHOR INDEX TO VOLUME 4

Ambrose, H. A. and A. G. Loomis. Fluidities of thixotropic gels: Bentonite suspensions—265
Arnold, J. Howard. Theory of the psychrometer. I. The mechanism of evaporation—255; II. The effect of velocity—334
Austin, J. B. and R. H. H. Pierce, Jr. Linear thermal expansion and alpha-gamma transformation temperature of pure iron—409

Ballantine, Stuart. Fluctuation noise due to collision ionization in electronic amplifier tubes—294
Bingham, Eugene C. and John A. Geddes. New correction in viscometry by the capillary-tube method—203
——— **and Markus Reiner.** Rheological properties of cement and cement-mortar-stone—88
——— **and Laurence W. Spooner.** Fluidity method for the determination of association. II—387
——— **and Robert A. Stephens.** Fluidities and associations of alcohols and esters of high molecular weight—206
Blair, G. W. Scott. On the nature of "yield-value"—113
Bloomenthal, Sidney. Converse piezoelectric effect in mixed crystals isomorphous with Rochelle salt—172
Brahtz, J. H. A. Stress distribution in wedges with arbitrary boundary forces—56

Campbell, E. M. (see Macdonald, P. A.)—237
Chen, S. H. (see Dwight, H. B.)—323
Churchill, R. V. General properties of steady temperatures in solids partially exposed to gas—50
Coe, J. R., Jr. Progress report on the determination of absolute viscosity—274
Crary, A. P. Thermal conductivity of Acheson graphite—332

Dawes, Chester L. Capacitance and potential gradients of eccentric cylindrical condensers—81
Dillon, J. H. and N. Johnston. Plastic properties of several types of unvulcanized rubber stocks at high rates of shear—225
Dwight, H. B. and S. H. Chen. Extension of a Maxwell mutual-inductance formula to apply to thick solenoids—323

Everett, Franklin L. Creep of metals in shear at high temperatures—119

Fonda, Gorton R., Andrew H. Young and Amy Walker. Diffusion of thorium in tungsten—1
Fox, Gerald W. and Morris Underwood. On the piezoelectric properties of tourmaline—10
Francis, Alfred W. Wall effect in falling ball method for viscosity—403

Garner, F. H. and C. I. Kelly. Kinematic viscosities and times of outflow from commercial viscometers—97
Geddes, John A. (see Bingham, Eugene C.)—203
Golay, M. J. E. (see Hershberger, W. D.)—291
Gray, Marion C. Mutual impedance of long grounded wires when the conductivity of the earth varies exponentially with depth—76

Hartley, Kenneth. Direct measurement of the gravitational effect of the moon—162
Hemingway, Allan and J. F. McClendon. Measurement of heat production in diathermy—351
Hershberger, W. D., H. A. Zahl and M. J. E. Golay. Luminous discharge between Lecher wires in a partially evacuated tube—291
Herzfeld, K. F. Temperature distribution of a gas flowing through a furnace—362
Hoekstra, J. Balance-plastometer; a simple instrument for measuring plasticity and recovery of soft materials—285
Hohlfelder, Leonard P. (see Hood, G. Raymond)—208
Hood, G. Raymond. Viscosity of urea in aqueous solution—211
——— **and Leonard P. Hohlfelder.** Viscosity of barium chloride in aqueous solution—208
Houghton, Henry G. Study of the evaporation of small water drops—419
Hulburt, E. O. Ionization in the upper atmosphere at about 200 km above sea level—196
Hull, A. W. Characteristics and functions of Thyratrons—66

Jensen, J. C. Ball lightning—372
Johnston, N. (see Dillon, J. H.)—225
Jones, Arthur Taber. Gliding of a snake—164
Jones, Grinnell and S. K. Talley. Automatic timing of the Ostwald viscometer by means of a photoelectric cell—215
Jordachescu (see Louis)—401

Kelly, C. I. (see Garner, F. H.)—97
Kenrick, G. W. Records of the effective height of the Kennelly-Heaviside layer—194
Kettering, Charles F. and W. W. Sleator. Infrared absorption spectra of certain organic compounds, including the principal types present in gasoline—39
Kock, Winston E. Effect of inductance on intermittent glow discharge—359
Kunz, Jakob and J. T. Tykociner. Photoelectric valve—246

Leet, L. Don. Velocity of elastic waves in granite and norite—375
Loomis, A. G. (see Ambrose, H. A.)—265
Louis, Jordachescu and Thiebault. Anomalies in the viscosity of mineral oils at low temperatures—401

Macdonald, P. A. and E. M. Campbell. High voltage sensitivity direct-current thermionic amplifier—237
——— **and T. W. Tweed.** Operating constants for direct-current thermionic amplifiers—178
McClendon, J. F. (see Hemingway, Allen)—351
McLean, D. A. Viscous resistance in capillaries of non-uniform radius—279
Muskat, Morris. Potential distribution about an electrode on the surface of the earth—129
——— Theory of refraction shooting—14

Pierce, R. H. H., Jr. (see Austin, J. B.)—409

Rashevsky, N. Some physico-mathematical aspects of nerve conduction—341
Reiner, Markus (see Bingham, Eugene C.)—88

Schofield, Robert Kenworthy. Simple derivations of some important relationships in capillary flow—122
Sears, William C. Effect of circuit parameters on the constancy of the frequency of a pliodynatron—241
Sleator, W. W. (see Kettering, Charles F.)—39
Slichter, L. B. Interpretation of the resistivity prospecting method for horizontal structures—307; Erratum—407
——— Inverse boundary value problem in electrodynamics—411
Smith, W. O. Final distribution of retained liquid in an ideal uniform soil—425
——— Minimum capillary rise in an ideal uniform soil—184
Snoddy, L. B. Ionization time of Thyratrons—366
——— Low voltage impulse circuits—327
Spooner, Laurence W. (see Bingham, Eugene C.)—387
Steinberger, R. L. Magnetic properties of the iron-nickel alloys under hydrostatic pressure—153
Stephens, Robert A. (see Bingham, Eugene C.)—206
Stillwell, Charles W. X-ray study of variations in the structure of wood fiber walls—167
——— **and Edward S. Turnipseed.** Corrosion of brass. The structure of the corroded surface—263

Talley, S. K. (see Jones, Grinnell)—215
Thiebault (see Louis)—401
Tollmien, W. On the turbulence statistics in Burgers' phase space—289
Turnipseed, Edward S. (see Stillwell, Charles W.)—263
Tweed, T. W. (see Macdonald, P. A.)—178
Tykociner, J. T. (see Kunz, Jakob)—246

Underwood, Morris (see Fox, Gerald W.)—10

Walker, Amy (see Fonda, Gorton R.)—1
Washburn, Harold W. Study of the electrical breakdown of liquids by means of the electro-optical shutter—29
Wilson, Thomas A. Crystal structure of uranium—148
Wise, W. Howard. Note on dipole radiation theory—354

Yamins, H. G. (see Zisman, W. A.)—7
Young, Andrew H. (see Fonda, Gorton R.)—1

Zahl, H. A. (see Hershberger, W. D.)—291
Zisman, W. A. and H. G. Yamins. Experiments on the contact potential of zinc crystals—7

ANALYTIC SUBJECT INDEX TO VOLUME 4

Activation
Effect of temperature distribution of a flowing gas, K. F. Herzfeld—362

Amplifiers
Direct-current thermionic amplifiers, P. A. Macdonald, T. W. Tweed—178
High voltage sensitivity direct-current amplifier, P. A. Macdonald, E. M. Campbell—237

Atmosphere (see **Meteorology**)

Biophysics
Gliding of a snake, A. T. Jones—164
Heat production in diathermy, A. Hemingway, J. F. McClendon—351
Physico-mathematical aspects of nerve conduction, N. Rashevsky—341
X-ray study of the structure of wood, C. W. Stillwell —167

Capillary action
Capillary rise in soil; theory, W. O. Smith—184
Distribution of retained liquid in ideal uniform soil, W. O. Smith—425
Simple derivations of relationships in capillary flow, R. K. Schofield—122

Contact potentials
Of Zn single crystals, W. A. Zisman, H. G. Yamins—7

Corrosion
Of brass, C. W. Stillwell, E. S. Turnipseed—263

Crystal structure
Of U. Crystal structures of low symmetry, T. A. Wilson —148

Crystalline state
Converse piezoelectric effect in mixed crystals, S. Bloomenthal—172
Corrosion of brass, C. W. Stillwell, E. S. Turnipseed—263
Creep of metals in shear, F. L. Everett—119
Magnetic properties of the Fe-Ni alloys under pressure, R. L. Steinberger—153
Piezoelectric properties of tourmaline, G. W. Fox, M. Underwood—10
Thermal expansion and alpha-gamma transformation of Fe, J. B. Austin, R. H. H. Pierce, Jr.—409

Diffusion
Of Th in W, G. R. Fonda, A. H. Young, A. Walker—1

Discharge of electricity in gases
Ball lighting, J. C. Jensen—372
Fluctuation noise in amplifier tubes, S. Ballantine—294
Intermittent glow discharge, W. E. Kock—359
Luminous discharge between Lecher wires, W. D. Hershberger, H. A. Zahl, M. J. E. Golay—291

Dynamics
Gliding of a snake, A. T. Jones—164

Elasticity
Creep of metals in shear, F. L. Everett—119
Nature of "yield-value," G. W. S. Blair—113
Plastic properties of rubber stocks, J. H. Dillon, N. Johnston—225
Refraction shooting theory, M. Muskat—14
Rheological properties of cement, E. C. Bingham, M. Reiner—88
Stress distribution in wedges, J. H. A. Brahtz—56
Velocity waves in granite and norite, L. D. Leet—375

Electrical circuits
Direct-current thermionic amplifiers, P. A. Macdonald, T. W. Tweed—178
Intermittent glow discharge, W. E. Kock—359
Low voltage impulse circuits using Thyratrons, L. B. Snoddy—327
Physico-mathematical aspects of nerve conduction, N. Rashevsky—341
Time lag of Thyratrons, L. B. Snoddy—366

Electrical conductivity and resistance
Of various parts of the human body, A. Hemingway, J. F. McClendon—351

Electrical oscillations and waves
Dipole radiation theory, W. H. Wise—354

Electromagnetic theory
Boundary value problem in geophysics, L. B. Slichter—307; Erratum—407
Dipole radiation theory, W. H. Wise—354
Inverse boundary value problem; geophysical application, L. B. Slichter—411
Mutual impedance of grounded wires, M. C. Gray—76
Mutual-inductance formula for thick solenoids, H. B. Dwight, S. H. Chen—323
Potential distribution about an electrode on the earth, M. Muskat—129

Electron tubes
Characteristics and functions of Thyratrons, A. W. Hull—66
Fluctuation noise in amplifier tubes, S. Ballantine—294
Thyratrons in impulse circuits, L. B. Snoddy—327
Time lag of Thyratrons, L. B. Snoddy—366

Electro-optical effects (see also **Photoelectric effect and properties**)
Double electro-optical shutter, H. W. Washburn—29

Electrostatics
Capacitance and potential gradients of eccentric cylindrical condensers, C. L. Dawes—81

Errata
Interpretation of the resistivity prospecting method for horizontal structures, L. B. Slichter—407

Evaporation
Psychrometer theory; effect of velocity, J. H. Arnold—334
Psychrometer theory; mechanism of evaporation, J. H. Arnold—255
Of small water drops, H. G. Houghton—419

Fluidities (see **Viscosity**)

Geophysics
Inverse boundary value problem, L. B. Slichter—411
Potential distribution about an electrode on the earth, M. Muskat—129
Refraction shooting theory, M. Muskat—14
Resistivity prospecting, L. B. Slichter—307; Erratum—407
Velocity of waves in granite and norite, L. D. Leet—375

Gravitation
Direct measurement of the effect of the moon, K. Hartley—162

Heat conduction (see also **Thermal conductivity**)
Temperature distribution of a flowing gas, K. F. Herzfeld—362
Temperatures in solids partially exposed to gas, R. V. Churchill—50

Humidity
Evaporation of small water drops, H. G. Houghton—419
Psychrometer theory; effect of velocity, J. H. Arnold—334
Psychrometer theory; mechanism of evaporation, J. H. Arnold—255

Hydrodynamics
Turbulence statistics in Burgers' phase space, W. Tollmien—289

Instruments (see **Methods and instruments**)

Kerr effect (see **Electro-optical effects**)

Liquids
Fluidities of alcohols and esters, E. C. Bingham, R. A. Stephens—206
Fluidities of 346 liquids, E. C. Bingham, L. W. Spooner—387

Magnetic properties
Of the Fe-Ni alloys under pressure, R. L. Steinberger—153

Meteorology
Ball lightning, J. C. Jensen—372
Evaporation of small water drops, H. G. Houghton—419
Height of the Kennelly-Heaviside layer, G. W. Kenrick—194
Ionization in upper atmosphere, E. O. Hulburt—196

Methods and instruments
Applications of Thyratrons, A. W. Hull—66
Balance-plastometer, J. Hoekstra—285
Crystal structures of low symmetry, T. A. Wilson—148
Extension plastometer, J. H. Dillon, N. Johnston—225
Flow in flour doughs, G. W. S. Blair—113
Fluidity method for determination of association, E. C. Bingham, L. W. Spooner—387
Gravitational effect of the moon, K. Hartley—162
High voltage sensitivity direct-current amplifier, P. A. Macdonald, E. M. Campbell—237
Inductance in intermittent glow discharge circuit, W. E. Kock—359
Kinematic viscosities and times of outflow from viscometers, F. H. Garner, C. I. Kelly—97
Lapping capillaries into circular cylinders, J. R. Coe, Jr.—274
Low voltage impulse circuits using Thyratrons, L. B. Snoddy—327
Luminous discharge between Lecher wires, W. D. Hershberger, H. A. Zahl, M. J. E. Golay—291
New correction in use of capillary-tube viscometer, E. C. Bingham, J. A. Geddes—203
Photoelectric valve, J. Kunz, J. T. Tykociner—246
Psychrometer theory; effect of velocity, J. H. Arnold—334
Psychrometer theory; mechanism of evaporation, J. H. Arnold—255
Resistance in capillaries of non-uniform radius, D. A. McLean—279
Time lag of Thyratrons, L. B. Snoddy—366
Timing of Ostwald viscometer by photoelectric cell, G. Jones, S. K. Talley—215
Wall effect in falling ball viscometer, A. W. Francis—403

Oscillators (see also **Electrical circuits**)
Circuit parameters and the frequency of a pliodynatron, W. C. Sears—241
Luminous discharge between Lecher wires, W. D. Hershberger, H. A. Zahl, M. J. E. Golay—291
Tourmaline piezoelectric, G. W. Fox, M. Underwood—10

Photoelectric effect and properties; Cells
Photoelectric valve; its characteristics, J. Kunz, J. T. Tykociner—246

Piezoelectric effect
Converse effect in mixed crystals, S. Bloomenthal—172
In tourmaline, G. W. Fox, M. Underwood—10

Plasticity

Balance-plastometer for measuring plasticity and recovery of soft materials, J. Hoekstra—285
Nature of "yield-value," G. W. S. Blair—113
Properties of rubber stocks, J. H. Dillon, N. Johnston—225
Rheological properties of cement, E. C. Bingham, M. Reiner—88

Polymerization

Of alcohols and esters, E. C. Bingham, R. A. Stephens—206
And fluidities, E. C. Bingham, L. W. Spooner—387

Prospecting (see **Geophysics**)

Radio

Dipole radiation theory, W. H. Wise—354
Fluctuation noise in amplifier tubes, S. Ballantine—294
Height of the Kennelly-Heaviside layer, G. W. Kenrick—194
Ionization in upper atmosphere, E. O. Hulburt—196

Resistance, electrical (see **Electrical conductivity and resistance**)

Soils

Distribution of retained liquid in ideal uniform soil, W. O. Smith—425

Spark discharge

Electrical breakdown of liquids, H. W. Washburn—29

Spectra, absorption

In infrared of organic compounds present in gasoline, C. F. Kettering, W. W. Sleator—39

Thermal conductivity

Of Acheson graphite, A. P. Crary—332
Temperature distribution of a flowing gas, K. F. Herzfeld—362

Thermal expansion

And alpha-gamma transformation of Fe, J. B. Austin, R. H. H. Pierce, Jr.—409

Thermionic emission of electrons; Emitting surfaces (see also **Electron tubes**)

Diffusion of Th in W, G. R. Fonda, A. H. Young, A. Walker—1

Transformation phenomena

Thermal expansion and alpha-gamma transformation of Fe, J. B. Austin, R. H. H. Pierce, Jr.—409

Vacuum tubes (see **Electron tubes**)

Vaporization (see **Evaporation**)

Viscosity

Anomalies of mineral oils at low temperatures, Louis, Jordachescu, Thiebault—401
And associations of alcohols and esters, E. C. Bingham, R. A. Stephens—206
Of $BaCl_2$ in aqueous solution, G. R. Hood, L. P. Hohlfelder—208
Determination of absolute viscosity, J. R. Coe, Jr.—274
Kinematic viscosities and times of outflow, F. H. Garner, C. I. Kelly—97
New correction in use of capillary-tube viscometer, E. C. Bingham, J. A. Geddes—203
Resistance in capillaries of non-uniform radius, D. A. McLean—279
Of thixotropic gels, H. A. Ambrose, A. G. Loomis—265
Of 346 liquids, E. C. Bingham, L. W. Spooner—387
Timing of Ostwald viscometer by photoelectric cell, G. Jones, S. K. Talley—215
Of urea in aqueous solution, G. R. Hood—211
Wall effect in falling ball viscometer, A. W. Francis—403

Wave motion

Luminous discharge between Lecher wires, W. D. Hershberger, H. A. Zahl, M. J. E. Golay—291
Refraction shooting theory, M. Muskat—14
Velocity of waves in granite and norite, L. D. Leet—375

X-rays, diffraction scattering, reflection, refraction and polarization

Structure of wood fiber walls, C. W. Stillwell—167
